WORK EXPERIENCE

Orb (later acquired by Adyen)

November 2021 - February 2026

Head of Forward Deployed Engineering | November 2023 - February 2026

San Francisco, CA

- Established Orb's post-sales function before dedicated support and success roles existed, owning the customer journey from onboarding through ongoing technical support.
- Hired and managed two engineers, scaling technical coverage to over 100 customers by building repeatable onboarding, escalation, and sales handoff processes.
- Led complex billing implementations for customers including Vercel, Perplexity, Replit, and Redis, aligning engineering, finance, and operations teams to bring customers into production.
- Built reusable billing capabilities from recurring customer requirements, unblocking implementations and migrations across the customer base.

Founding Engineer | November 2021 - November 2023

- As Orb's first employee, built core components of the billing engine and invoicing product across the full stack, spanning metering, pricing, credits, and external integrations.

Samsara

September 2018 - November 2021

Software Engineer | Compliance Team

San Francisco, CA

- Built full-stack Hours of Service compliance features for trucking companies and drivers, improving datafile infrastructure, e-logbook accuracy, and management of automatically generated drive time.
- Led project teams to ship features, resolve critical customer issues, and improve infrastructure across Go services, TypeScript and React web applications, and React Native mobile apps.
- Onboarded and mentored three summer interns, guiding technical design and delivery of an auditing service and a document upload feature.

Qualtrics

May 2017 - August 2017

Software Engineering Intern | Vocalize Team

Seattle, WA

- Built a full-stack customer usage reporting system using Node.js, Angular, and AWS services including DynamoDB, Lambda, S3, and Kinesis.

Facebook

May 2016 - August 2016, May 2015 - August 2015

Frontend Engineering Intern | Business Identity & Ads Management Teams

Menlo Park, CA

- Built find-and-replace, visualization, and bulk-editing features for Business Manager and Power Editor.

COMMUNITY

First Commits

January 2026 - Present

Co-Founder

San Francisco, CA

- Co-founded and co-run a community of over 100 founding engineers, creating opportunities for technical advice, product feedback, and peer support through in-person gatherings and a Slack forum.

EDUCATION

University of Illinois at Urbana-Champaign

Class of 2018

- BS & MS in Computer Science. Hoeft Technology & Management Program, 2017.
- Awards: Knight of St. Patrick 2017, Siebel Scholar Class of 2018
- Leadership: ACM President, Reflections | Projections Co-Chair, and HackIllinois Sponsorship Director, raising over \$250,000 for the hackathon.
- Research: Built Opico to study emoji-only communication, resulting in a master's thesis and WWW 2019 paper. Co-authored the proposal for the boba emoji.
